Element Consulting Celebrates Completion of Santa Ana College's New State-of-the-Art Track and Football Field

SANTA ANA, CA (August 13, 2026) – Element Consulting, Inc. is proud to celebrate the completion of Santa Ana College's (SAC) new state-of-the-art track and football field, marking an important milestone in the college's continued investment in its student-athletes and campus community. Element provided construction management services for the athletic facility, helping bring the project from vision to reality.

The ribbon-cutting ceremony brought together SAC leadership, student-athletes, faculty, staff, project partners, and community members to celebrate the completion of the new field and the opportunities it will provide for students and the broader community.

The newly completed athletic facility provides a modern space designed to support SAC's student-athletes while also expanding opportunities for kinesiology classes and community education programs.

The project included the replacement of the natural turf with synthetic turf on the main field, resurfacing and re-leveling the transition between the inner track curb and the turf, and installation of a new digital video scoreboard. These improvements were designed to enhance safety, accommodate the continued growth of SAC's student and athletic programs, and bring the Dons' football and field events back to a modernized home turf.

The upgraded facility reflects SAC's continued commitment to providing students with high-quality resources and environments that support academic, athletic, and personal success.

"By investing in our communities, we are doing our part to honor a promise that this college will always keep our students and our communities first," said SAC President Dr. Annebelle Nery. "This new facility is an investment in our students and in the future of our community."

The celebration also recognized the collaboration and dedication that helped transform the project from plans into a completed facility.

"Your efforts turned blueprints into a long-awaited reality," said SAC Dean of Kinesiology, Health and Athletics Andrea Picchi, recognizing the project team and partners who helped bring the facility to life.

For Element Consulting Project Manager David Larios, the project represents the impact that thoughtful project management and collaboration can have on a campus and its students.

"It's incredibly rewarding to see this project come full circle and to see the SAC community come together to celebrate," said Larios. "This facility is more than a new track and football field, it creates a place where student-athletes can compete, students can learn, and the broader community can come together. The Element team is proud to have played a role in bringing this vision to reality."

As the Dons prepare for the upcoming fall season, the college community celebrated not only the completion of the facility, but also the opportunities it will provide for years to come.

Element Consulting congratulates SAC, its student-athletes, faculty, staff, and the entire SAC community on this exciting milestone and wishes the Dons a successful fall season.
